Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims are rejected under 35 U.S.C. 102(e) as being unpatentable over Carvey et al., US Patent No. 6,359,879 B1, hereafter referred to as Carvey.

Regarding claims 1, 5 and 8, Carvey disclose a method and system called composite trunking. Carvey teaches that the system comprises plurality of routers connected by a plurality of trunks (links) of a composite trunk. Furthermore, Carvey discloses that if data flow at an output port of the router is overloaded, imbalanced, or bottle-necked, the system switches the data to another port; figs. 2-3; abstract; col. 2, line 36-col. 3, line 9; and col. 6, lines 59-65.

Art Unit: 2667

Regarding claim 4, Carvey discloses that the forwarding table (routing table) may be modified to dynamically balance load across the trunks (links); abstract; col. 6, lines 59-61.

Regarding claim 7, Carvey teaches that the system comprises plurality of routers connected by a plurality of trunks (links) of a composite trunk. Furthermore, Carvey discloses that if data flow at an output port of the router is overloaded, imbalanced, or bottle-necked, the system switches the data to another port; figs. 2-3; abstract; col. 2, line 36-col. 3, line 9; and col. 6, lines 59-65. Furthermore, Carvey discloses that the forwarding table (routing table) may be modified to dynamically balance load across the trunks (links); abstract; col. 6, lines 59-61.

Response to Arguments

Applicant's arguments with respect to claims 1, 5 and 8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following references are cited to further show the state of the art with respect to the application:

US Patent No. 6252878 B1, Locklear et al. disclose "Switched architecture access server"

US Patent No. 6147991 A, Rogers discloses "High speed packet switch using packet diversion through dedicated channels"
